

# PATIENT MEDICATION RECORD

Medication is often one of the most important aspects of at-home treatment. However, medication usage is often a confusing and overwhelming issue for many. While taking a pill may seem like a simple solution, most medications come with limitations, side effects, and other things patients need to be aware of. Using this medication record card can help you keep better track of your medications and help you be better prepared when you visit the doctor.

## Patient Medication Record

Patient Name: \_\_\_\_\_

Address: \_\_\_\_\_

Phone: \_\_\_\_\_

Date Updated: \_\_\_\_\_

Drug	Dosage	Time of Administration	Physician	Side Effects
