PREVIOUS RESEARCH EXPERIENCE

WASHINGTON UNIVERSITY SCHOOL OF MEDICINE

Department of Neurosurgery, Research Analyst. *June 2004 – August 2004*.

JEFF GIDDAY, PhD

- Used mouse model to investigate the molecular basis of hypoxic preconditioning, a process by which a sublethal ischemic insult protects brain tissue against future ischemic/hypoxic injury. Utilized microsurgical techniques, as well as cell culture, protein quantification, and DNA analysis to specifically elucidate the role of the molecule *survivin* in this process.

Department of Urology, Research Analyst. *September 2003 – May 2004*

St. Louis, MO

PREVIOUS RESEARCH EXPERIENCE (Continued)

JAMIE LANDMAN, MD

- Used porcine model and cell culture techniques to elucidate optimal conditions for urothelial cell culture; investigated ideal structural shapes and materials to provide scaffolds for ex vivo bladder synthesis.

MASSACHUSETTS GENERAL HOSPITAL EAST

Boston, MA

Day Neuromuscular Lab, Research Analyst. *June 1998 – June 1999.*

ROBERT H. BROWN, MD, PhD

- Led 4-member student team in research project aimed at elucidating the causes of Lou Gehrig's Disease, focusing specifically on the role of SOD1 aggregation in the pathology of the disease. Project culminated in Honors thesis.
