

Orthopedics & Spine Center

Thank you for choosing Panorama Orthopedics & Spine Center. Outlined below is the information that you may find useful during your entire injection process.

- Now that you have chosen to have an injection, orders will be generated and submitted to our pre-authorization team. Panorama Orthopedics will evaluate your medical history and may contact you for further information.
- Prior to your injection our pre-authorization team will contact your insurance company to obtain authorization for your injection. Once authorization is obtained a member of our injection/surgery scheduling team will contact you.
- They will contact you to discuss the date, time, and location of your injection. Dr. Knight/Horner performs the injections at the Golden Ridge Surgery Center (GRSC) or at Panorama Orthopedics & Spine Center (Golden office).
- Dr. Knight/Horner will want to see you 2 weeks following your injection for further assessment.
- **Please remember you must speak with your primary care physician prior to your injection if you are currently taking blood thinners. Failure to contact your primary care physician may result in your injection being cancelled.**
- **If you are diabetic please make sure to notify the injection/surgery scheduler to insure the appropriate injection time is scheduled. This will help to insure that you are not going without food any longer than necessary.**

- All questions regarding insurance, time, location, and date of your injection will be handled through our pre-authorization team. Please contact them directly with any concerns at #303-233-1223 ext. 7331

If your procedure is scheduled with Dr. Knight and you have any additional concerns, you may contact her clinical liaison Matt at (303) 233-1223.

If your procedure is scheduled with Dr. Horner and you have any additional concerns, you may contact his clinical liaison Dareth at (303) 233-1223.
